ISO CERTIFICATION

PT Artha Hutama Persada has been officially certified by Indosystem, an accredited certification body, reflecting its commitment to implementing internationally recognized ISO management system standards as part of its corporate governance and operational framework. These certifications serve as a foundation for ensuring consistent performance, compliance, and continuous improvement throughout the Company's business activities. Details of the specific ISO certifications held by the Company are presented in the following section.

Quality and Service Management System Certification

Quality is paramount. The ISO 9001:2015 certification obtained by PT Artha Hutama Persada serves as international recognition of the company's consistently high service standards.

Occupational Health and Safety System Certification

Human resources are a key asset to a company's success, and their safety should be prioritized. PT Artha Hutama Persada fully recognizes this and has achieved ISO 45001:2018 certification for a safe and healthy work environment.

Environmental Management System Certification

PT Artha Hutama Persada consistently prioritizes the long-term impact of its business activities on the environment. This is evidenced by its achievement of ISO 14001:2015 certification.

SBU CERTIFICATION

PT Artha Hutama Persada holds a valid Business Entity Certification (Sertifikat Badan Usaha / SBU) issued by GAPENSI (Indonesian National Association of Construction Companies), confirming its legal eligibility, technical capability, and professional competence to undertake building construction works in accordance with applicable regulations and industry standards.

Residential Building Construction

Construction of housing and residential facilities in compliance with safety and quality standards.

Office Building Construction

Development of office and workplace buildings to support business activities.

Industrial Building Construction

Construction of industrial facilities such as factories and warehouses.

Commercial and Shopping Building Construction

Construction of commercial and retail buildings, including shopping centers.

Healthcare Building Construction

Development of healthcare facilities such as hospitals and clinics.

Educational Building Construction
